

BandRich

**E800(5G)/E700(LTE Cat12)/E700A(LTE
Cat12)/E600(LTE Cat6)/E600A(LTE Cat6)**

Outdoor Unit

Introduction and Examples

BandRich Strategic Partnerships

- Business licensee partner since 2006
- Modem/Wi-Fi/Router chipsets supplier

- Business partner since 2017
- Modem module supplier (Qualcomm chipsets)

E800/E700/E700A/E600/E600A Key Features

- IP67 with built-in heater – Build for Extreme weather
- High gain antenna – over 5 dBm for low band and about 10 dBm for high band
- Remote management – support HTTPS, TR069, SNMP
- 5G NSA/SA(E800 using Qualcomm SDX55)
- Carrier Aggregation – 4 CA(80Mhz BW) – LTE Cat20 of E800
- 3 CA(60Mhz BW) – 256QAM DL 600M/UL 150M of E700/E700A
- 2 CA(40MHz BW) – 64QAM DL 300M/UL 50M of E600/E600A
- Support router/Bridge mode-- can be use with Cisco ASA and relay LTE microcell
- Complete “Plug and Play” solution, only requiring power to enable backhaul to be

Modem

Sierra Wireless
AirPrime
EM7565/7511/7455
/7430
Qualcomm
Snapdragon X7

Router

Qualcomm
IPQ4019
Quad-core A7

USB 3.0

Super High
Speed

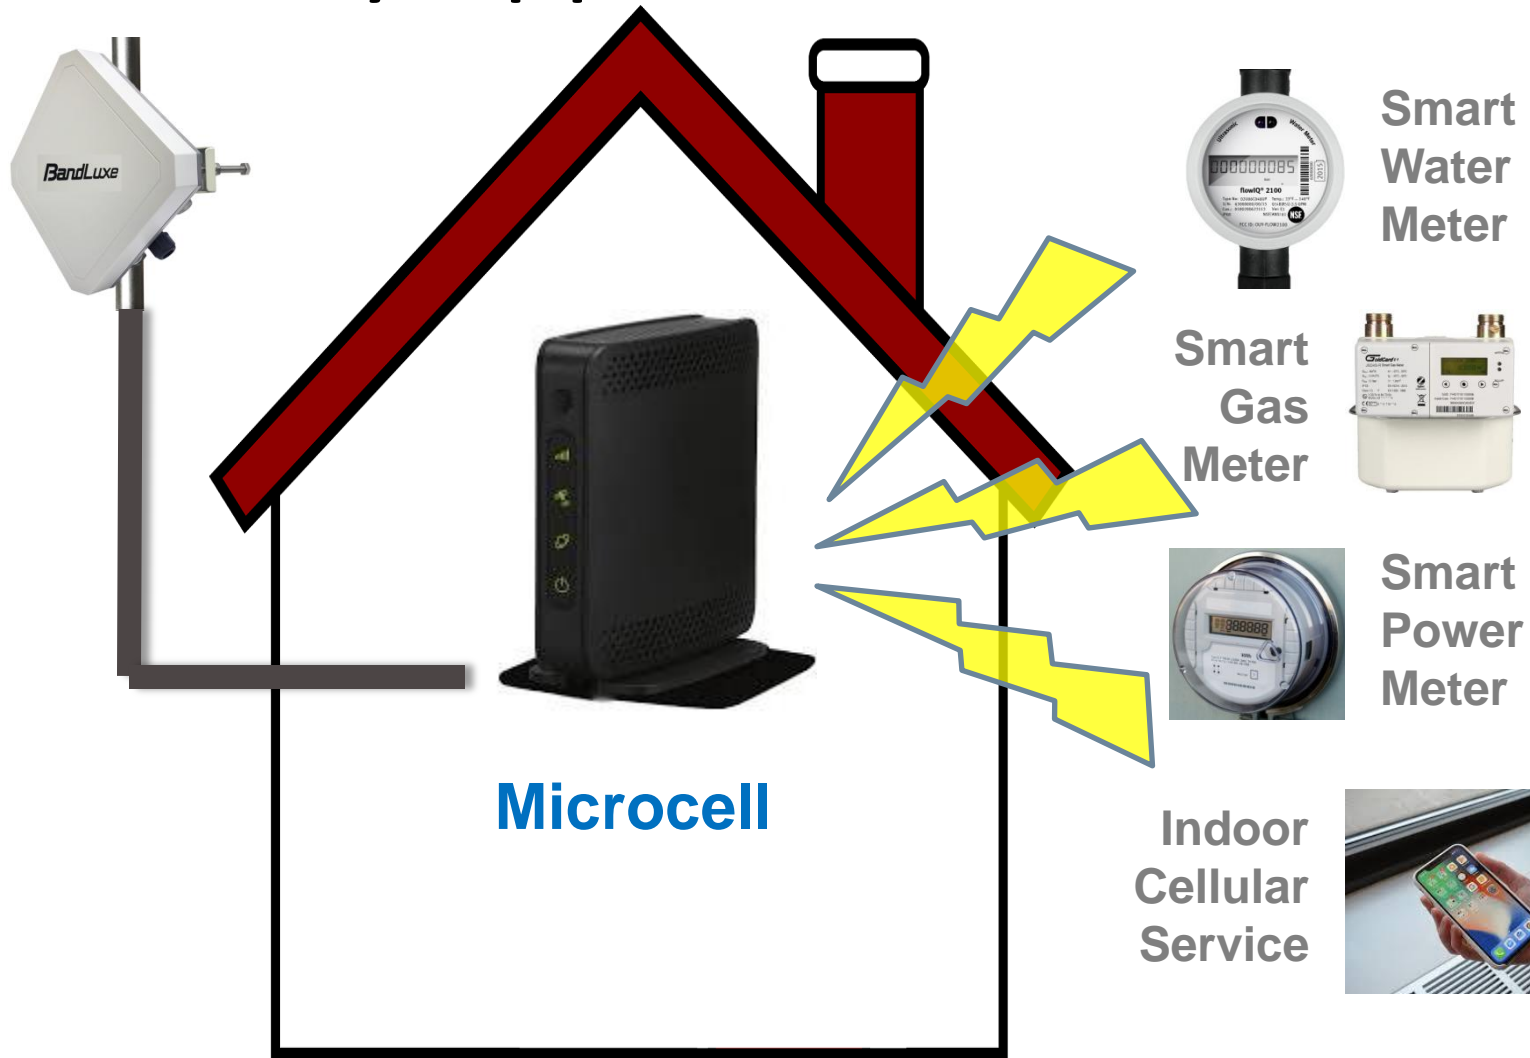

Gigabit

Qualcomm
QCA8075
Gigabit POE

Main or Backup internet IoT Application - WiFi Based

IoT Relay Application - SIM Based

Application– Solar Powered

- For the most remote area. Solar panel is the only power source
- E600 consumes less than 5 W in normal status. Even when the built-in heater kicks in it only consumes less than 30 W.
- Picture is from Australia and the ODU is about 22km(about 13.7 miles) away from tower

William,
Pictures attached.

1. Base station is located 22 Km from E600A high up on a distant hill.

= 1 square foot

LTE Relay to the Microwave/Solar panel provide the power

After-sale Service

- Jack Wu, local tech support in US
- RMA cases will be handle in the US to shorten the turn around time. Typically less than three days from the day of receiving.
- Warranty: ONE (1) YEAR from the date of shipping

BandRich Roadmap

18 Q3	18 Q4	19 Q1	19 Q2
E600/E600A, Cat 6 ODU, 2CA, DL 300/UL 50			
		E700/E700A, Cat 12 ODU, 3CA, DL 600/UL 150	
In Production		5G Products	
Planned		NB-IoT Products	

- E600/E600A is in production and current lead time is about 10 business days
- E700/E700A working sample available in 19Q1

Installation Case(I) – Michigan State

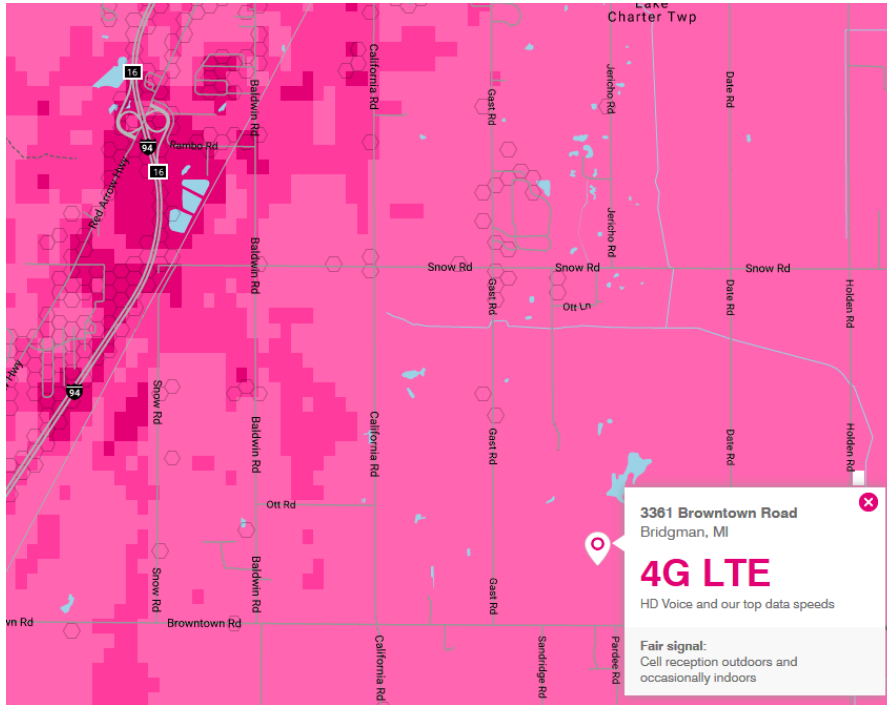

On Wed, Jun 20, 2018 at 2:14 PM, Dennis [REDACTED] wrote:

With using the different carriers lately verizon seems to be the only one that works reliability most of the time do u have any cost effective options that will work with 3 verizon cellular modems i have found a couple that would be nice but they start at 4000 to 5000 for just the hardware. Im trying to find something 1000 or less?

On Wed, Jun 20, 2018 at 4:19 PM, Dennis [REDACTED] wrote:

What speed do u think educated guess at least a decent 4g connection? 2 M byte per second? With verizon where im at i can normaly get 4 or more unless its like a holiday when every one is on. At night its way fast but with tethering im limited to 15 gigs then its chopped to 60 kilobytes a second which is unusable even for email because of all the adds and pictures they use on every thing.

Installation Case(I) – Michigan State

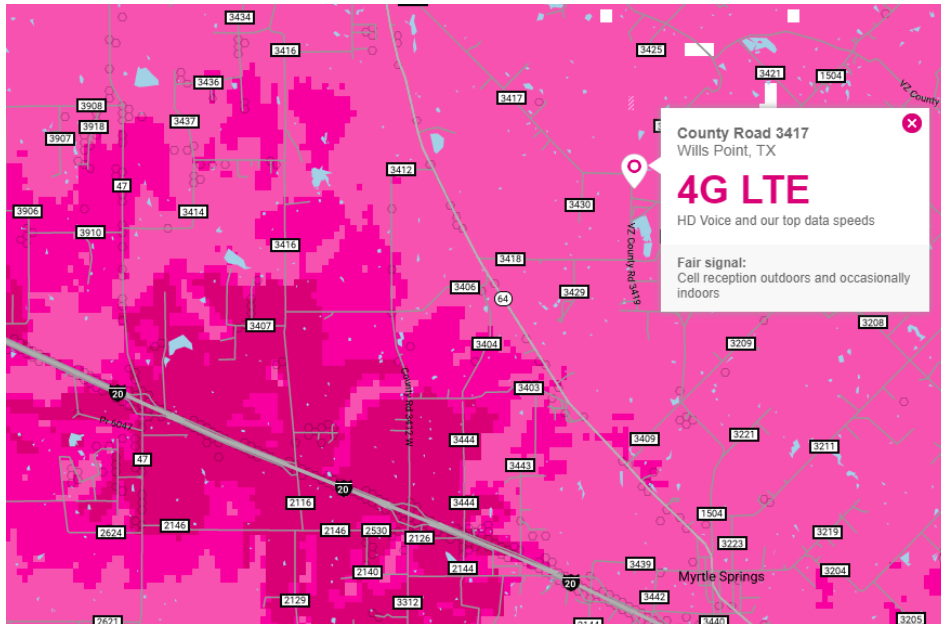

- T-Mobile fair signal area: **cell reception outdoors and occasionally indoors.**
- 2.5 miles away from T-Mobile tower located at NW.
- Customer installed E600 by himself.

Happy customer here after.

Installation Case(I) – Michigan State

Installation Case(II) – Texas State

- T-Mobile fair signal area: **cell reception outdoors and occasionally indoors.**
- 3.5 miles away from T-Mobile tower located at SW.
- Customer installed E600 by himself.

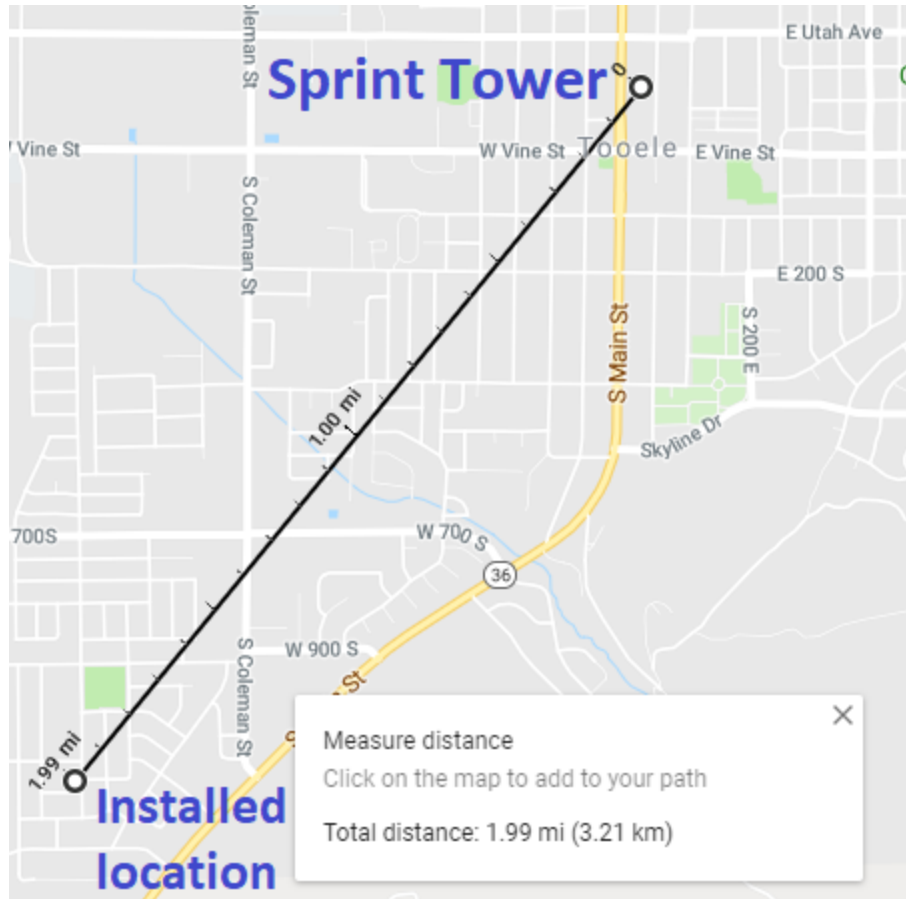

Happy customer here after, too.

Installation Case(II) – Texas State

Installation Case(III) – Utah State

- 2 miles away from Sprint tower located at NE.

Installation Case(III) – Utah State

- Good internet solution for outskirts where customers don't have many landline choices

Installation Case(IV) – Australia

Very far between ODU and Base station

- Robust IP66 housing with built-in heater for any environments
- 50km(about 31miles) away from tower. DL 35Mbps/UL 17Mbps

Distance and Altitude between Base Station and ODU
